Long-term investing: Four tips for staying on course

It can be difficult to stay the course during periods of market volatility and uncertainty. Follow these four tips to help stay on course: Review your portfolio regularly. Diversify your portfolio.* Avoid owning too much of a single investment. And finally, stay invested. Schedule time today with your financial advisor to discuss your long-term financial strategy. *Diversification does not guarantee a profit or protect against loss in declining markets.

Important tax form information

As of Feb. 15, Edward Jones has furnished all required 2023 Consolidated 1099 Tax Statements to clients. If you received a Figures Not Final tax statement, that means at least one issuer of a security you held during 2023 did not provide us final tax information by Feb. 15. Once we receive final information for your securities, we will furnish you a final tax form, no later than March 15. Visit edwardjones.com/taxcenter to learn more.

Financial Foundation

Reaching your personal financial goals depends on a strong foundation. At Edward Jones, we believe that foundation consists of regular reviews of your goals and their time frames, your comfort with risk (such as market volatility) and the way assets are allocated within your portfolio. Following is a summary of your financial foundation based on your discussions with your financial advisor.

Retirement Goal for Lisa and Aaron Welch

Preparing for Retirement	Risk Tolerance	Planned Retirement	Desired Annual Spending	Retirement Portfolio Objective
	Lisa High	Lisa to Retire at Age 65	\$126,000	Growth Focus
	Aaron High	Aaron to Retire at Age 65		

The Desired Annual Spending amount does not include variable expenses or debt payments you may have discussed with your financial advisor.

When was your last review?

If you haven't had a review with your financial advisor in the past 12 months, now is the time to do so. Together, you can discuss changes in - and outside - your life and determine if any changes are needed. Even if no action is necessary, a check-in can help ensure your finances are still on track toward your goals.

Your Personal Rate of Return: Your Personal Rate of Return measures the investment performance of your account. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing Your Personal Rate of Return is important to help ensure you're on track to achieving your financial goals.

Performance Benchmarks: Your Personal Rate of Return should be compared to the return necessary to achieve your financial goals. However, we understand many investors would like to compare their Personal Rate of Return to market indexes. Keep in mind this may not be an accurate comparison, as your Personal Rate of Return incorporates the timing of your specific additions and withdrawals and your specific investment mix, while published returns of market indexes do not.

These market indexes are used as a general measure of market performance for several major asset classes. Market indexes assume reinvestment of all distributions and do not take into account brokerage fees, taxes or investment management fees.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan.1, 2009. This also includes investments you owned during this time period but have since sold. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Rate of Return information on account statements uses the dollar-weighted calculation. Time-weighted Rate of Return numbers for Advisory Solutions Fund and UMA accounts can be found on your Quarterly Performance Report through Online Account Access. If you are not an Online Access user, visit edwardjones.com/access to sign up.

Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.

For the most current information, contact your financial advisor or visit edwardjones.com/performance.

Rate of Return Indexes Definitions

S&P 500 Index: A broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks. While many of the stocks are among the largest, this index also includes many relatively small companies. It is a float adjusted capitalization-weighted index (stock price times number of publicly available shares outstanding), calculated on a total return basis with dividends reinvested.

MSCI EAFE Index: A market weighted index maintained by Morgan Stanley Capital International composed of foreign stocks from developed markets (excluding the U.S. and Canada).

Bloomberg Aggregate Bond Index: Measures the performance of government, mortgage-backed, asset-backed and corporate securities with at least one year to maturity.

Estimated Yield

The Estimated Yield (EY) in the preceding section compares the anticipated earnings on your investments in the coming year to the current price of the investments. It is based on past interest and dividend payments made by the securities held in your account. Changes in the price of a security over time or in the amount of the investment held in your account will cause the EY to vary. The EY is only an estimate and cannot be guaranteed by Edward Jones or the issuers of the securities. Your actual yield may be higher or lower than the estimated amounts. Estimates for any securities that have a return of principal or capital gain may be overstated. Income cannot be estimated for any securities that do not have an annual payment amount or frequency available at the time of estimation. Yield to Maturity is typically reported for Zero Coupon Bonds as these securities do not have an annual payment.
